Helps you work safely.

Get the coverage you need with this versatile new fall protection system. Available in both the M100 and M200 Series, the 3M™ DBI-SALA® Flexiguard™ Modular Jib System features a simplified design that enhances worker safety in multiple applications. Increased rail-length configurations improve working coverage while a new design facilitates easier system transport.

More versatility

New modular product offering provides

80 unique application solutions

- ▶ Extruded aluminium overhead horizontal rail for SRL trolley
- ▶ Stainless steel anchor trolley
- ▶ Dual by-passing rails (two user models)

Patent pending fail-safe mast lock

- ▶ Eliminates need for height-locking fasteners like pins and bolts
- ▶ Automatic safety lock engages to prevent uncontrolled mast movement if primary lifting mechanism fails
- ▶ Flip up rotation handle
- ▶ Improve productivity with the optional power assisted device. When equipped, it adjusts height four times faster than the manual adjustment of previous 3M models

- ▶ Rotating mast up to 360 degrees (most models)
- ▶ 3M™ Safety-Walk Slip Resistant walking surface (counterweight bases)

Powder coated and galvanised components

Extended reach

- ▶ New M200 version offers improved reach on 4,6m (15ft.) configurations enabling up to 3,7m (12ft.) more reach than previous models

Increased height

- ▶ Improved maximum height for 9,1m (30ft.) models enables up to 1,5m (5ft.) more vertical height versus previous models
- ▶ Semi-fixed models come with 1,5m (5ft.) of height adjustment for maximum flexibility during field installations
- ▶ Removable counterweight box (counterweight bases) with built in fork pockets and lifting ring attachment points (sold separately)
- ▶ Integrated leveling bubbles (counterweight bases)

- ▶ Open multi-directional base designed to accommodate a wide array of fork shapes and sizes

Enhanced safety working area.

- ▶ Extended rail-lengths increase safe working area coverage
- ▶ Reduces risk of potential swing fall hazards – worker and safety manager can visually verify the straight vertical boundary
- ▶ Simplifies fall clearance requirements

Dual user rated

Select M200 models only

- ▶ Helps increase worksite efficiency and safety for multiple workers
- ▶ Provides additional working coverage compared to previous 3M models
- ▶ Dual user systems contain two independent bypassing horizontal rails rated for one worker each
